

CARONDELET NEUROLOGICAL INSTITUTE

Presents

A Community Education Event

Strokes, also called “brain attacks,” usually strike without warning. They’re the third leading cause of death in America and a major cause of disabilities. But when you have the right information, there’s hope. Join us for this FREE program.

Brain Attack: When Minutes Matter

You may be at risk for a stroke

Learn how to reduce your risk of stroke,
the symptoms of a stroke and how to react if a stroke strikes.
